

Your Name

Dhaka, Bangladesh · +880 1XXXXXXX · youremail@example.com ·  LinkedIn ·  GitHub

Summary

Experienced Software Engineer with 2+ years in backend development and 1+ year in ReactJS, specializing in scalable SaaS solutions. Proficient in PHP, MySQL, Node.js, React, React Native, TypeScript, and modern web technologies. Proven ability to develop and enhance complex systems, including microservices with REST APIs on AWS, utilizing Docker and Kubernetes. Eager to contribute to a fast-paced, collaborative environment, ensuring service observability and delivering impactful features for the Gig economy.

Skills

Backend: Node.js, PHP, NestJs, Microservice Architecture, REST APIs, Event-Driven Architecture (RabbitMQ/Kafka), Express.js
Frontend: React, React Native, Redux, TypeScript, ES6, JavaScript, HTML, CSS, SASS/LESS, Responsive Design
Databases: MySQL, PostgreSQL, MongoDB, SQL
DevOps/Cloud: AWS, Docker, Kubernetes, Git, CI/CD, Linux/Ubuntu
Tools & Practices: Software Observability (APM), Monitoring, Unit Testing, Integration Testing, Agile, Scrum, JIRA, Confluence

Experience

Senior Software Engineer	Dhaka, Bangladesh
Tech Innovations Inc.	Jan 2022 – Present
Developed and maintained critical backend services using Node.js and PHP, transitioning monolithic applications to a microservice architecture exposed via REST APIs.	
Built and enhanced client-facing applications using React and Redux, ensuring responsive and high-performance user interfaces for both web and mobile applications.	
Deployed and managed services on AWS using Docker containers orchestrated by Kubernetes, improving system scalability and reliability.	
Implemented comprehensive service observability, monitoring, and alerting mechanisms to maintain high SLI/SLO for critical SaaS solutions.	
Collaborated with Product Management and UX teams to translate requirements into technical specifications and deliver impactful features.	
Leveraged MySQL for database management and optimized queries for improved application performance.	
Software Engineer	Dhaka, Bangladesh
Global Solutions Ltd.	Aug 2020 – Dec 2021
Contributed to the development of a large-scale enterprise platform, focusing on both backend (PHP, MySQL) and frontend (React, TypeScript, ES6).	
Implemented and consumed REST APIs for seamless data exchange between services and client applications.	
Utilized Git for version control and actively participated in code reviews, ensuring code quality and adherence to standards.	
Assisted in the migration of legacy systems to modern architectures, gaining experience with containerization using Docker.	
Collaborated effectively with cross-functional and offshore teams to meet project deadlines and deliver robust software solutions.	

Projects

Gig Economy Platform (Personal Project)	Open Source
Self-Directed	2023
Developed a full-stack platform for service professionals, featuring Node.js backend microservices with REST APIs and a React Native mobile application.	
Integrated RabbitMQ for event-driven architecture to handle asynchronous tasks and notifications.	

Deployed the application to AWS using Docker Compose, demonstrating proficiency in cloud deployment and containerization.

Real-time Chat Application

Open Source

University Project

2019

Built a real-time chat application using Node.js with WebSockets for the backend and React for the frontend, demonstrating proficiency in TypeScript and ES6.

Designed and implemented a clean, standards-compliant UI using HTML and SASS.

Education

B.Sc. in Computer Science and Engineering

Dhaka, Bangladesh

Bangladesh University of Engineering and Technology (BUET)

Graduated: 2020

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Software Engineering
